Peerless Plumbing Company and Nudrain Phoenix expands hydro jetting services, helping restaurants reduce grease buildup, sewer odors, and drain backups.

PHOENIX, AZ, UNITED STATES, September 29, 2026 / EINPresswire.com/ -- Peerless Plumbing Company and Nudrain Phoenix is expanding its commercial plumbing capabilities with the addition of a second hydro jetting unit, allowing the team to better serve restaurants throughout the Phoenix area. This investment allows Peerless Plumbing Company and Nudrain Phoenix to increase service availability, support more commercial maintenance schedules, and help restaurants maintain reliable drain and sewer performance.

Addressing Common Restaurant Plumbing Challenges

Restaurants often deal with grease, food particles, soap residue, and other materials that collect inside drain and sewer lines over time. These blockages may contribute to slow drains, unpleasant sewer odors, recurring clogs, and restroom backups that can interrupt business and affect the customer experience. Regular hydro jetting uses high-pressure water to clear accumulated debris from pipe walls, helping improve drainage performance without relying on harsh chemicals.

Helping Businesses Stay Ahead of Plumbing Problems

Routine drain maintenance is an important part of keeping commercial kitchens operating

smoothly. Scheduled hydro jetting services can reduce the buildup that frequently develops in high-use plumbing systems while supporting better drainage throughout the property. With an additional hydro jetting unit now available, Peerless Plumbing Company and Nudrain Phoenix is prepared to accommodate more commercial maintenance schedules and respond efficiently when restaurants need professional assistance.
