Zoviz Now Available in the Microsoft Marketplace

Microsoft customers worldwide can now discover and deploy Zoviz Enterprise Content Creation through Microsoft Marketplace.

Zoviz Enterprise Content Creation is now available on Microsoft Marketplace

NEW YORK, NY, UNITED STATES, September 29, 2026 / EINPresswire.com/ -- Microsoft customers worldwide can now discover and deploy Zoviz Enterprise Content Creation through Microsoft Marketplace, accessing trusted solutions that accelerate innovation and business transformation with unified integration across Microsoft products.

Zoviz today announced the availability of Zoviz Enterprise Content Creation in the Microsoft Marketplace, the unified online destination for customers to buy trusted cloud solutions, AI apps, and agents to meet their business needs. Zoviz customers can now discover and deploy trusted solutions through Microsoft Marketplace, with smooth integration and streamlined management across Microsoft Azure and other Microsoft products.

> Our customers set their brand once, and everything Zoviz creates stays on brand”
>
> *Erhan Kaya, Founder and CEO, Zoviz*

Founded in 2022 and operated by Kaya Smart LLC, Zoviz serves millions of businesses in over 190 countries and offers its platform in more than 100 languages. The Zoviz app for Microsoft 365 Copilot builds on the Zoviz MCP server to let teams create logos, brand assets, and marketing content directly from Copilot. The app draws on your brand profile, so every output follows your brand's identity, voice, and visual rules without repeated prompting.

Zoviz Enterprise Content Creation gives marketing teams one governed workspace to produce images, video, and campaign assets using leading AI models under the controls IT expects: single sign on through Entra ID, a central admin console with role-based access and seat management,

locked brand kits and approved templates, and annual credit pools shared across the team. Zoviz Canvas provides a node-based AI generation workspace, Zoviz Studio provides on brand design and editing with thousands of templates, and Zoviz Developers provides APIs and an MCP server to automate content workflows end to end.

Behind the platform is the Zoviz Logo Engine, a programmatic vector logo generation API that supports more than 100 languages, including right to left scripts such as Arabic, Hebrew, and Urdu. Rather than producing raster images, the engine matches human crafted designer icons with AI and returns true vector files that businesses can edit and own, drawing on a library of millions of icons and thousands of templates. Enterprise and white label partners use it to generate on-brand identities at scale through a single API. Zoviz runs its AI workloads on Microsoft Azure GPU infrastructure.

"Our customers set their brand once, and everything Zoviz creates stays on brand," said Erhan Kaya, Founder and CEO of Zoviz. "Enterprise teams can now buy Zoviz through the agreements they already have and bring their brand context into Microsoft 365 Copilot. We built Zoviz to serve businesses in every market and every script, and Microsoft gives us that reach through a global enterprise channel."

"We're pleased to welcome Zoviz Enterprise Content Creation to Microsoft Marketplace," said Cyril Belikoff, vice president, Microsoft Azure Product Marketing. "Marketplace connects trusted solutions from global partners with customers worldwide, making it easy to find and deploy apps that work seamlessly with Microsoft products."
