Total Paving Solutions Plymouth Expands to Two Teams as Demand for Outdoor Home Improvements Grows

PLYMOUTH, ENGLAND, UNITED KINGDOM, September 30, 2026 /EINPresswire.com/ -- A Plymouth paving and landscaping company has expanded to two working teams, increasing its capacity to help homeowners across Plymouth and surrounding areas improve their driveways, patios and gardens.

Total Paving Solutions Plymouth has steadily broadened the range of work it undertakes, moving beyond traditional paving to provide everything from resin and concrete driveways to landscaping, turfing, groundwork, drainage-related work and exterior maintenance.

The move to two teams means the company can take on more projects while continuing to give each job the attention it needs.

Total Paving Solutions Plymouth

More Choice for Plymouth Homeowners

Anyone who has renovated a home knows that improving the outside can quickly turn into several different jobs.

A new driveway might highlight tired fencing. A new patio may lead to plans for a lawn or landscaping. An area suffering from standing water might need drainage work before the visible transformation can even begin.

Total Paving Solutions has developed its services with this in mind.

Today, customers can choose from block paving, resin bound driveways, tarmac, gravel and concrete, as well as bonded aggregate surfacing and permeable paving.

For existing surfaces that don't necessarily need complete replacement, the company also

provides driveway and patio cleaning and sealing, maintenance and repair services.

More information about its driveway and block paving services is available online.

From Driveways to Complete Garden Transformations

The company's work doesn't stop at the front of the house.

As more people look for ways to enjoy their gardens, patios have become genuine outdoor living areas – places for family meals, barbecues, entertaining friends or simply sitting outside when the British weather cooperates.

Total Paving Solutions installs patios and provides garden landscaping, garden services, turfing and lawn installation, allowing customers to transform a larger outdoor area rather than concentrating on paving alone.

Porcelain paving is one option for homeowners wanting a clean, contemporary appearance, while more traditional paving can be used to create a completely different character.

Customers considering a modern garden transformation can explore the company's porcelain patio services in Plymouth.

Two Teams Means More Capacity

Expanding to two teams is an important development for the business.

Rather than being limited to one project at a time, the additional capacity gives Total Paving Solutions greater flexibility to manage different types of work across the area.

Its services now include:

- Block paving and resin bound driveways
- Concrete, tarmac and gravel driveways
- Bonded aggregate surfacing
- Permeable paving
- Driveway maintenance and repairs
- Driveway and patio cleaning and sealing
- Porcelain and natural stone patios
- Garden landscaping and garden services
- Turfing and lawn installation
- Groundwork
- Soakaways and drainage-related work
- Exterior painting

Sometimes the Most Important Work Isn't Visible

While customers naturally focus on how their new driveway or patio will look, some of the most important work happens before the finished surface goes down.
Preparation, groundwork, levels and drainage can all have a major influence on a project.
This is why offering groundwork and drainage-related services is particularly useful. If an outdoor area has drainage problems or requires additional preparation, these issues can be considered as part of the wider project rather than concentrating only on the surface finish.

Helping Local Homes Make More of Their Outdoor Space
For Total Paving Solutions, the expansion isn't simply about completing more jobs. It's about being able to offer homeowners more possibilities.
One customer may simply need an ageing driveway repaired. Another might want to replace everything and completely change the front of the property. Elsewhere, a family might have a garden they rarely use and want to introduce a new patio, lawn and landscaping.
Every property is different, and that's part of what makes outdoor transformation projects interesting.
With two teams now operating and an increasingly diverse range of services available, Total Paving Solutions Plymouth is continuing to build its presence across Plymouth and surrounding communities.
Homeowners can view examples of services and find further information on the Total Paving Solutions Plymouth website or call 07468 272 097 to discuss a project and request a free quotation.
