The Tokenized Asset Foundation Welcomes EvolveNP as a Corporate Founding Member

EvolveNP joins the Foundation to help advance the intersection of blockchain infrastructure, transparent fundraising, and verifiable nonprofit impact.

Tokenized Asset Foundation

MIAMI, FL, UNITED STATES, September 30, 2026 /EINPresswire.com/ -- The Tokenized Asset Foundation (TAF) today announced that EvolveNP has joined the foundation as a Corporate Founding Member, expanding the Foundation's growing global ecosystem into nonprofit and grant fundraising, philanthropy, and onchain impact infrastructure.

> Your Gateway to Global Real World Asset Tokenization
> Bringing together the people, knowledge, resources, and opportunities shaping the future of Real-World Asset tokenization globally."
>
> *Randy Goldberg*

EvolveNP is developing an onchain protocol designed for nonprofit and grant fundraising, with a focus on creating stronger connections between fundraising activity, transparency, verification, and measurable impact.

Its approach reflects a broader opportunity for blockchain infrastructure beyond traditional financial asset tokenization: using programmable, transparent systems to improve how organizations raise, track, verify, and communicate the deployment of capital.

The addition of EvolveNP also expands the range of use cases represented within the Tokenized Asset Foundation as it brings together organizations working across tokenization technology, financial infrastructure, compliance, capital markets, blockchain, professional services, issuers, and emerging onchain applications. The Foundation's mission is to connect the participants, knowledge, resources, and opportunities shaping global real-world asset tokenization.

Bringing Onchain Infrastructure to Nonprofit and Grant Fundraising
"EvolveNP's mission centers around one core belief: onchain markets should have a simple, standardized path to real-world impact."

The company is working to create a bridge between onchain activity and nonprofit and grant impact, providing infrastructure intended to make fundraising activity more transparent and verifiable.

As a Corporate Founding Member, EvolveNP will participate in the Foundation's broader ecosystem and collaborate with members across blockchain infrastructure, tokenization, compliance, technology, capital formation, education, and other areas relevant to the development of responsible onchain markets.

EvolveNP

Randy Goldberg, President of the Tokenized Asset Foundation, said: "We're excited to welcome EvolveNP as a Corporate Founding Member. What particularly interested us about EvolveNP is that they are applying onchain infrastructure to an area with enormous potential for greater transparency and accountability: nonprofit and grant fundraising and philanthropy. Tokenization and blockchain technology can extend well beyond traditional financial assets, and EvolveNP brings an important new perspective to our ecosystem."

"As the Foundation grows, we want to bring together organizations building practical applications of this technology. EvolveNP's focus on connecting onchain activity with real-world nonprofit impact fits naturally with that objective."

Expanding the Definition of Onchain Impact
The relationship will provide opportunities for EvolveNP to participate in Foundation educational initiatives, industry discussions, member programs, content, events, and collaboration across the Foundation's international network.

The Tokenized Asset Foundation is developing additional member initiatives through TAF Labs, including working groups, expert clinics, professional education, an RWA Opportunity Exchange, a member RFP marketplace, regulatory resources, and other programs designed to connect organizations across the tokenized asset ecosystem. Several of these programs remain in development or exploration.

EvolveNP's participation will also introduce nonprofit and philanthropic use cases into

conversations that have traditionally centered on tokenized securities, real-world assets, capital markets, and institutional digital assets.

About EvolveNP
EvolveNP is developing an onchain protocol for nonprofit fundraising focused on connecting blockchain-based activity with transparent and verifiable nonprofit impact. Its vision is to provide infrastructure that helps organizations build, fund, verify, and scale impact while taking advantage of the transparency and programmability available through onchain technology.
