

Industrial Coatings Market Expected to Reach \$134.71 Billion by 2030 Driven by Robust Industry Expansion

The Business Research Company's Industrial Coatings Global Market Report 2026 – Market Size, Trends, And Forecast 2026-2035

LONDON, GREATER LONDON, UNITED KINGDOM, October 5, 2026 /EINPresswire.com/ -- The [industrial coatings market](#) has witnessed substantial growth recently, driven by rising industrial activities and expanding sectors such as automotive and transportation. As industries evolve, the demand for specialized coatings that protect equipment and infrastructure continues to rise, paving the way for further market expansion in the coming years.

Current Size and Projected Growth of the [Industrial Coatings](#) Market
The industrial coatings market has experienced impressive development, with its value expected to increase

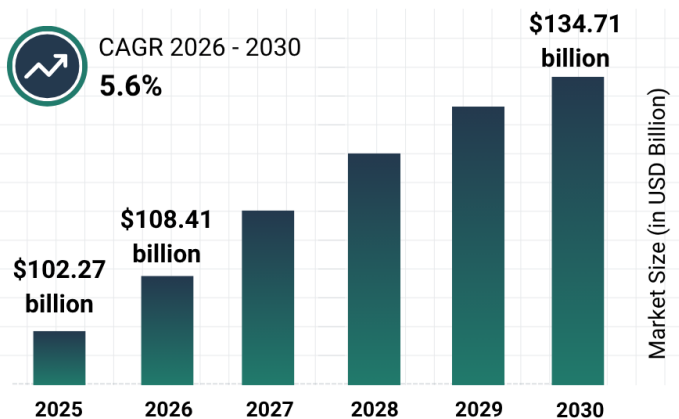

from \$102.27 billion in 2025 to \$108.41 billion in 2026, representing a compound annual growth rate (CAGR) of 6.0%. This growth during the past years has been fueled by expanding industrial infrastructure, heightened need for corrosion protection, the broadening of automotive and transportation sectors, wider use of protective coatings in heavy machinery, and greater investments in manufacturing and construction projects. Looking ahead, the market is forecasted to reach \$134.71 billion by 2030, growing at a CAGR of 5.6%. Factors contributing to this future growth include demand for eco-friendly water-based and powder coatings, adoption of advanced functional coatings, expansion of electric vehicle production, a need for highly durable coatings in industrial equipment, and advancements in smart coating technologies.

Understanding Industrial Coatings and Their Purpose

Industrial coatings are specialized materials designed to shield surfaces from damage caused by wear, chemical exposure, and environmental factors, while also boosting overall performance. These coatings are engineered to provide long-lasting durability and resistance, even under challenging operating conditions, making them essential in maintaining the integrity and functionality of industrial assets.

Factors Boosting Market Expansion of Industrial Coatings

One of the primary drivers behind the industrial coatings market growth is the surge in industrialization and manufacturing activities worldwide. Industrialization involves expanding production capabilities and transforming raw materials into finished products through advanced, technology-driven manufacturing processes. The increasing demand for manufactured goods is encouraging industries to scale up production capacity and invest in new facilities. Industrial coatings play a vital role in this process by enhancing the durability and performance of industrial machinery and infrastructure, thereby minimizing maintenance needs and extending equipment lifespan. For instance, data from December 2024 by the United Nations Industrial Development Organization showed a 0.4% growth in global manufacturing output during the third quarter of 2024 compared to the previous quarter, with industrializing economies experiencing a 0.5% increase. This ongoing industrial growth is a significant factor propelling the expansion of the industrial coatings market.

Which Region Will Dominate the Industrial Coatings Market by 2026

In 2025, Asia-Pacific held the largest share of the industrial coatings market and is forecasted to be the fastest-growing region during the coming years. The market analysis includes key areas such as Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a broad perspective on regional trends and opportunities.

Key enhancements in our 2026 market reports include:

- Market attractiveness scoring and analysis
- Total addressable market (TAM) analysis
- Company scoring matrix graphics and tables
- Excel-based forecasting dashboards
- Market hotspots infographics
- Key technologies and future trend analysis
- Updated graphics and tables
