PubConcierge Expands IPv4 Leasing Infrastructure Across APAC Through Singapore, Tokyo and Sydney

PubConcierge expands infrastructure in Singapore, Tokyo and Sydney to support IPv4 leasing needs across the APAC region.

WILMINGTON, DE, UNITED STATES, October 1, 2026 /EINPresswire.com/ -- PubConcierge, a global IPv4 leasing provider and managed IP broker, is strengthening its support for IP leasing in Asia through its expanded infrastructure hub in Singapore. The company will attend Affiliate World Asia in Bangkok, Thailand, on December 9–10, 2026, bringing a practical question to conversations with businesses expanding across the region: “Will a leased IP range actually work for the markets, platforms, and applications they need to serve?"

> Our Singapore, Tokyo and Sydney presence gives us a regional infrastructure base, while our team helps customers evaluate the IP resources and deployment details behind each solution.”
>
> *Sabina Uta, Sales Director PubConcierge*

Over the past 18 months, PubConcierge has increased its upstream capacity in APAC by more than 500% while expanding its bare-metal and cloud infrastructure across the region. The company now offers enterprise-grade services through Equinix SG3 in Singapore, Equinix TY8 in Tokyo, and Equinix SY1/SY2 in Sydney. Its managed leasing service combines IP sourcing with reputation screening, routing support, technical setup and dedicated account management. Customers can discuss their requirements and test a proposed solution before committing.

For performance marketers and the infrastructure teams behind them, an IP range's monthly price and regional registry are only starting points. Ad verification, market intelligence, proxy networks and data operations can have different requirements for location, reputation, routing, latency and continuity. PubConcierge recommends checking a proposed range against the customer's actual workload before comparing offers on price alone.

“The real question for an APAC rollout is how many addresses can actually be put to work in the right locations, with the routing and reputation the application needs,” said Sabina Uta, Sales Director of PubConcierge. “Our Singapore, Tokyo and Sydney presence gives us a regional

infrastructure base, while our team helps customers evaluate the IP resources and deployment details behind each solution."

Sabina Uta, Sales Director - PubConcierge

At Affiliate World Asia, PubConcierge will meet with proxy platforms, advertisers, agencies and data-driven businesses to discuss APAC expansion, IP availability and deployment planning. Attendees can request a conversation about their target countries, expected capacity, routing environment and testing criteria through PubConcierge's website.

The company's Singapore SG3 expansion announcement describes its regional infrastructure presence. Affiliate World Asia takes place at the Centara Grand and Bangkok Convention Center on December 9–10, 2026.

About PubConcierge

PubConcierge is a global provider of enterprise-grade IPv4 leasing and managed IP brokerage, with access to more than 20 million IP addresses. It helps businesses secure IPv4 and IPv6 capacity for AI data operations, proxy infrastructure, cloud, cybersecurity, and telecom, backed by reputation screening, routing support, and dedicated account management.
