Coatings Market Set For Rapid Expansion With 4.2% CAGR Through 2030

The Business Research Company's Coatings Market Report 2026 – Market Size, Trends, And Global Forecast 2026-2035

Coatings Market

The Business Research Company

LONDON, GREATER LONDON, UNITED KINGDOM, October 1, 2026 /EINPresswire.com/ -- "The coatings industry has been steadily expanding, reflecting its vital role across various sectors. With ongoing advancements and increasing applications, this market is set for continued growth. Let's explore the current size, key growth drivers, leading regions, and future market dynamics shaping the coatings industry.

Market Size and Growth Trajectory of the Coatings Market

In recent years, the coatings market has experienced consistent growth. It is projected to increase from $140.74 billion in 2025 to $146.3 billion in 2026, representing a compound annual growth rate (CAGR) of 4.0%. This upward trend during the historical period is largely driven by the growth in construction and infrastructure projects, expansion in automotive manufacturing, rising demand for corrosion protection, heightened industrial production, and widespread use of solvent-based coating systems. Looking ahead, the market is expected to reach $172.41 billion by 2030, growing at a CAGR of 4.2%. This future expansion is anticipated due to the shift toward sustainable, bio-based coatings, growing electric vehicle production, smart infrastructure developments, increased aerospace and defense coating applications, as well as growth in industrial automation and advanced manufacturing. Key trends shaping the forecast include a rising preference for eco-friendly, low-VOC coatings, greater adoption of waterborne and powder-based technologies, demand for high-performance

protective and corrosion-resistant coatings, growth in smart and functional coatings for industrial uses, and increased use of lightweight coatings in automotive and aerospace sectors.

Understanding Coatings and Their Functional Importance
Coatings are specially formulated chemical products applied as thin layers on surfaces to provide protection, decoration, or enhanced functionality. They improve resistance against corrosion, wear, chemicals, ultraviolet light, and other environmental factors, while also enhancing the appearance and surface qualities of materials. These coatings serve a critical role in maintaining the longevity and performance of various products and structures across industries.

Construction and Infrastructure Development as a Growth Catalyst for Coatings
One of the primary drivers behind the coatings market expansion is the rise in construction and infrastructure development. This encompasses increased activity in residential, commercial, industrial, and public projects, which boosts the demand for buildings, transport networks, and utility systems. This growth is fueled by urban population increases and more investment in infrastructure projects worldwide. Coatings play an essential role here by protecting surfaces from corrosion, moisture, weather effects, and wear, thereby improving the durability, safety, and aesthetics of structures like buildings, bridges, roads, and industrial facilities. For example, in February 2025, the Office for National Statistics in the UK reported a 0.4% increase in total annual construction output in 2024 compared to the previous year, highlighting ongoing growth in this sector that positively impacts coatings demand.

Additional Factors Supporting Coatings Market Expansion
Beyond construction, other key influences are supporting market growth, including the rise in automotive manufacturing, particularly the shift toward electric vehicles requiring specialized coatings. Industrial production growth and adoption of innovative coating technologies such as bio-based and smart coatings also contribute to this positive outlook. The demand for advanced protective coatings that improve product longevity and performance is becoming increasingly significant across multiple industries.

Asia-Pacific Leading and Accelerating Coatings Market Growth
The Asia-Pacific region held the largest share of the coatings market in 2025 and is expected to maintain its position as the fastest-growing region during the forecast period. This rapid growth is driven by expanding industrialization, urbanization, and infrastructure projects in countries

within Asia-Pacific. The market report covers other important regions as well, including South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a comprehensive perspective on global market trends and regional developments.

Our 2026 market reports now feature expanded strategic intelligence through market attractiveness scoring and analysis, total addressable market (TAM) analysis, company scoring matrix graphics and tables, Excel-based dashboards, market hotspots infographics, key technology and future trend analysis, along with updated graphics and tables.
