ISTANBUL, TURKEY, October 5, 2026 /EINPresswire.com/ -- complead (formerly Sanction Scanner), AI-native risk infrastructure for fraud and financial crime, has been named to the Deloitte Technology Fast 50 Türkiye ranking for the fourth time. The company appeared on the list as Sanction Scanner in 2022 and 2023, ranking 8th both years, and again in 2024. This year marks its first recognition under the complead name.

Deloitte Technology Fast 50 has ranked technology companies in Türkiye since 2006, based on net revenue growth over a three-year period. To qualify, companies must develop proprietary technology and make significant investments in R&D. Winners are nominated for the regional Technology Fast 500 EMEA ranking, where complead was recognized in 2023 and 2024.

> Being on this list for the fourth time shows that our growth is not an isolated occurrence."
>
> *Fatih Coşkun, Founder and CEO, complead*

Over the ranking period, complead grew to serve more than 800 financial institutions in over 80 countries, opened a New York office to serve the US market, and brought screening, KYC, KYB, adverse media, transaction monitoring and fraud prevention together in one platform.

The company's growth rests on a simple principle: compliance teams do not need more tools, they need fewer handoffs. Every complead product runs on Fusion, a shared decision engine that treats each customer as a single risk profile instead of separate records spread across

different systems.

"Being on this list for the fourth time shows that our growth is not an isolated occurrence," said Fatih Coşkun, Founder & CEO of complead. "It is the result of customers who stay with us, expand their business with us and help us enter new markets."
