Disploy Digital Signage - Multiscreen Offer

LANGHORNE, PA, UNITED STATES, October 2, 2026 /EINPresswire.com/ -- In Langhorne, Pennsylvania, a new offer is ready to launch, but the screens at half the outlets are still displaying last month's menu. This is a problem that business owners who have more than one location will recognize. Disploy, a cloud-based digital signage platform, provides a more straightforward solution in this regard: you only need to update the content once and then publish it to all the screens at all locations from a single dashboard.

Across industries, owners with multiple outlets run into the same hurdle. Changing what appears on a screen often means driving to each location, relying on staff to do it correctly, or carrying content around on USB drives. It takes time, it requires some technical know-how, and it means offers and announcements often reach customers late.

Disploy removes the need for that effort. To use the service, businesses subscribe to the platform, produce their content with Disploy Studio, and then assign and schedule it for one or multiple locations. Since everything is handled in the cloud, there is no need to carry around USB drives, no need to hire technical staff, and no learning curve before a screen can be updated.

The system is also designed to be compatible with the equipment businesses currently have. Since Disploy is compatible with Android, Windows, Fire TV, Samsung, and LG WebOS, businesses can use their existing screens without purchasing special hardware. Scheduling features enable campaigns to be planned in advance, and role-based access allows each individual location to manage its own content while the head office maintains control of the brand.

Disploy Solution - Multiscreen and Multilocation

Disploy serves more than 12 industries, including retail, hospitality, healthcare, education, fitness, and real estate. Among its clients is the restaurant chain Sankalp, which uses Disploy to keep its screens in sync and deliver offers and announcements across its outlets. Other clients include Chapati Man, Sam's Pizza, Premiere Dental, Laari, and Taranovas Pizza.

"People who run businesses should spend their time managing the business rather than traveling from store to store to replace screens. That's why we developed Disploy: to make managing each display as easy as managing one. "
- Owner of Disploy
