Tolt Technologies Releases Ability Drive® for iPad and the A13i, Letting People Drive a Power Wheelchair with Their Eyes

Drive a power wheelchair and adjust seating just by looking at an iPad. Ability Drive® for iPad and the new Tolt Technologies A13i are available to order now.

A13i with Ability Drive

DUVALL, WA, UNITED STATES, October 1, 2026 /EINPresswire.com/ -- For many people living with ALS, spinal muscular atrophy, muscular dystrophy, or a spinal cord injury, there comes a day when the joystick no longer works for them. For others, including many people with cerebral palsy, a joystick was never an option. Either way, it can mean waiting on someone else to get where they want to go. Tolt Technologies is changing that with Ability Drive® for iPad, which lets a person drive their power wheelchair using only their eyes.

It works simply. The person looks at an arrow on the screen and the chair moves in that direction. When they look away, the chair stops.

> Independence in mobility is everything. Our mission has always been to give power wheelchair users a drive control that meets them where they are."
>
> *Tracy Beavers*

Ability Drive® for iPad is available to order now, along with the new Tolt Technologies A13i. The A13i pairs an iPad with an eyetuitive eye tracker, so one device can drive the chair, adjust the seating, and run the iPad. Someone can drive across the room, tilt to get comfortable, or meet their pressure management goals.

"Independence in mobility is everything," said Tracy Beavers, CEO and Founder of Tolt Technologies. "Our

mission has always been to give power wheelchair users a drive control that meets them where they are."

People pick it up quickly. Tolt Technologies has watched people who had never used a power wheelchair or an eye gaze device drive through a doorway in under a minute.

Ability Drive® for iPad works with three devices:

The Tolt Technologies A13i
The Forbes ProSlate 13™ with Enable Eyes®
Apple Vision Pro, with support available in visionOS 27

About Tolt Technologies
Tolt Technologies builds Ability Drive®, a system that lets a person control their seating and drive a wheelchair with their eyes. It bridges two worlds that rarely meet: the eye gaze device a person speaks with and the wheelchair they use to navigate their world. The company is women owned and family run, and manufactures in Duvall, Washington. Distributors carry Ability Drive® in the United States, Canada, Argentina, Australia, New Zealand, and Europe. Founded 2020.
