

Ninth annual InsurTech100 reveals the movers and shakers in the insurance sector

Research firm FinTech Global has unveiled the new InsurTech100 edition, recognising the most innovative technology companies shaping the future of insurance.

LONDON, UNITED KINGDOM, October 6, 2026 /EINPresswire.com/ -- The ninth annual edition of the [InsurTech100](#) comes at a time of rapid change across the insurance industry, as AI, automation and advanced data capabilities reshape how insurers develop products, assess risk and engage with customers.

FinTech Global Logo

As these technologies move from experimentation into practical applications, InsurTechs are playing an increasingly critical role in helping insurers improve efficiency, modernise legacy processes and respond to changing market demands.

The InsurTech sector is going from strength to strength. Based on recent research the industry is set to grow from \$21.96bn in 2025 to \$30.24bn in 2026 at a CAGR of 37.7%.

Against this backdrop of strong industry growth, securing a place on the 2026 InsurTech100 reflects the growing depth and maturity of the global InsurTech market. The companies recognised this year represent a diverse range of approaches to some of the industry's most pressing challenges. To create the list, a panel of analysts and industry experts reviewed a list of over 2,100 InsurTech companies assembled by [FinTech Global](#).

The finalists were recognised for their ability to apply technology to address challenges across the insurance value chain, while helping insurers become more efficient, data-driven and adaptable in a rapidly evolving market.

FinTech Global CEO Richard Sachar commented, "The InsurTech100 reflects how quickly the role

of technology in insurance is evolving. This year's companies are not simply introducing new tools; they are tackling in innovative ways some of the industry's biggest challenges across areas such as underwriting, claims, risk assessment, distribution and customer engagement.

"As insurers look to make better use of data, automation and AI, this list is a must-read to find out about the firms helping turn that ambition into practical solutions with the potential to reshape how insurance operates."

Here is a quick look at some of the innovative and fast-growing InsurTechs that made the list:

Bdeo: transforms insurance claims through Visual Intelligence, helping 70+ insurers across 30+ countries streamline decisions and build trust

Boleron: provides structured European insurance product data and distribution infrastructure for discovery, comparison and compliant access across AI platforms

bolttch: the world's most globally-scaled insurtech, delivering innovative insurance and protection solutions through its leading technology-enabled ecosystem

Cara: an AI platform purpose-built for insurance brokerages to accelerate sales and automate servicing through a 24/7 digital workforce

Combined Ratio: offers insurance policy admin software that is open-source license-free forever

Equifax: empowers insurers and insurtechs with purpose-built data assets, predictive analytics, and risk scores to optimise insurance operations

ForMotiv: offers real-time behavioral intent data for insurers to boost conversions, reduce fraud and improve underwriting decisions

insured.io: the complete digital front-end for policyholders, integrating insurer's portal, IVR, SMS, payments, and claims in a single premium platform

insureMO: an API-first AI powered middle office platform empowering carriers and distributors to launch embedded products and ecosystem partnerships rapidly

INTX: the complete (Re)Insurance Operating System, unifying ceded and assumed reinsurance, core insurance and native intelligence on one data layer

iPipeline: a leading global provider of integrated, AI-powered digital solutions for the life insurance and financial services industries

Ledgertech: an AI-driven, cloud-native insurance core platform enabling phased modernization, product launches in weeks, embedded distribution, and operational continuity

Majesco: leads native-AI and cloud insurance platforms for P&C and L&AH, delivering intelligent SaaS solutions that transform speed, insight, and outcomes

Nanoinsure: Agentic AI Software Suite unifies product development, point-of-sale, incentive management, and policy administration into a modular enterprise platform

nCino: supports brokers, underwriters, and networks with the tools to build meaningful relationships, onboard customers and comply with evolving regulation

ReSource Pro: The trusted partner insurance teams rely on for strategic operations and technology services that optimize growth and performance

Symphony: secure communication technology company enabling insurers to accelerate AI impact, navigate complex regulatory compliance and optimize business interaction

Taktile: enables insurance companies including Allianz Partners to control the decisions that define their performance, and constantly improve with AI

Vellum Insurance: uses AI to help insurance and reinsurance companies unlock their data, identify trends and proactively manage risks
