

# EMMA International Launches Breast Cancer Awareness Month Educational Series

*October initiative highlights the role of quality, regulatory compliance, and innovation in advancing breast cancer care.*

MIAMI, FL, UNITED STATES, October 6, 2026 /EINPresswire.com/ -- [EMMA International](#) Consulting Group, a life sciences consulting firm, announces the launch of an educational series in recognition of [Breast Cancer Awareness Month](#). Throughout October, the series will explore how quality systems, [regulatory strategy](#), and responsible innovation support the development of products used in breast cancer detection, diagnosis, and treatment.

Breast Cancer Awareness Month provides an opportunity to recognize patients, survivors, caregivers, healthcare professionals, and researchers while encouraging continued education. EMMA International's series will bring a life sciences perspective to that conversation, highlighting the work behind the therapies and technologies that support patient care.

The series will examine topics such as regulatory considerations for oncology products, quality and data integrity in clinical development, and the challenges organizations face when bringing new technologies to market. Through educational content, EMMA International aims to help industry professionals connect their daily responsibilities with the patients their work ultimately serves.

"In the life sciences industry, it can be easy to become focused on regulations, processes, documentation, and deadlines. Breast Cancer Awareness Month is an important reminder of

EMMA International Launches Breast Cancer Awareness Month Educational Series

why that work matters,” said Kira Jabri, COO of EMMA International. “Behind every quality system, regulatory submission, clinical study, and new technology are patients and families waiting for better options. Our responsibility as an industry is to make sure innovation moves forward without losing sight of the people it is ultimately intended to serve.”

Developing a promising therapy or diagnostic technology requires more than scientific discovery. Organizations must also establish reliable processes, generate sound evidence, and maintain quality throughout development and commercialization. These responsibilities help support informed decisions and confidence in the products used by healthcare professionals and patients.

THROUGHOUT OCTOBER, THE SERIES WILL EXPLORE HOW QUALITY SYSTEMS, REGULATORY STRATEGY, AND RESPONSIBLE INNOVATION SUPPORT THE DEVELOPMENT OF PRODUCTS USED IN BREAST CANCER DETECTION, DIAGNOSIS, AND TREATMENT.

The development of products used in breast cancer detection

The initiative reflects EMMA International’s commitment to making complex quality and regulatory topics more accessible. By connecting industry education with Breast Cancer
