High Performance Systems Corp. Expands Commercial and Industrial Epoxy Flooring Solutions Across Key Tri-State Markets

High Performance Systems Corp. Expands Commercial and Industrial Epoxy Flooring Solutions

Commercial Kitchens

MIDDLESEX, NJ, UNITED STATES, October 5, 2026 /EINPresswire.com/ -- High Performance Systems Corp., a premier certified commercial and industrial resinous flooring contractor headquartered in Middlesex, New Jersey, today announced the expansion of its specialized epoxy and urethane flooring services across New Jersey, New York, and Pennsylvania.

Serving commercial, industrial, food & beverage, pharmaceutical, and logistics facilities since 1988, High Performance Systems continues to set industry standards by delivering high-durability, seamless surface solutions engineered to meet rigorous regulatory compliance and withstand demanding operational environments.

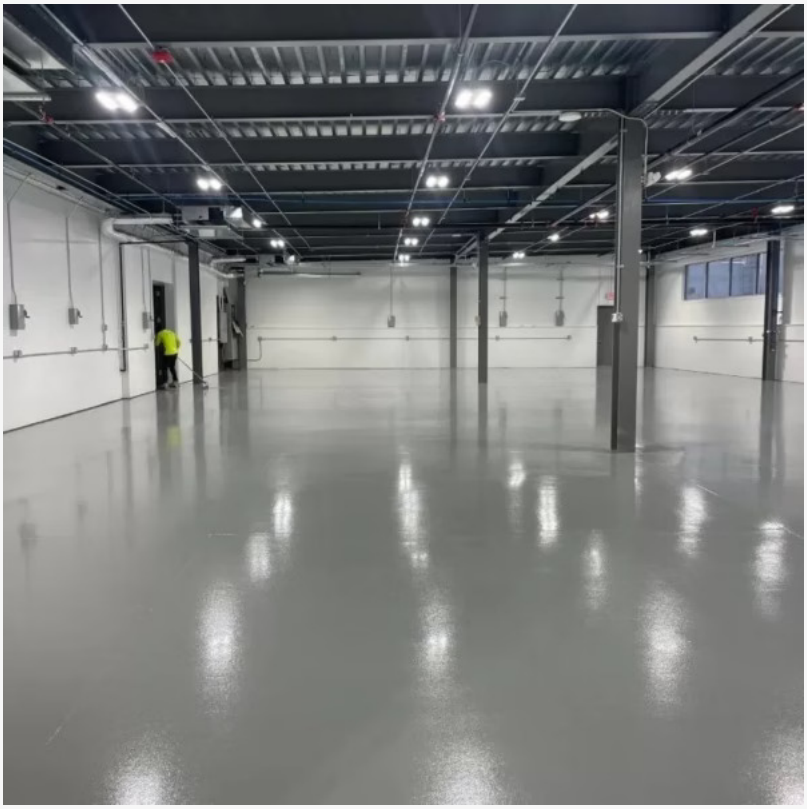

Engineered for Rigorous Operational and Regulatory Demands
Industrial and commercial environments require specialized flooring systems that can handle heavy mechanical impact, harsh chemical exposure, and strict hygiene mandates. High Performance Systems designs and installs custom resinous flooring systems tailored to specific facility needs:

Commercial & Restaurant Kitchens: Seamless, thermal-shock-resistant urethane cement systems engineered to endure rapid temperature fluctuations, hot oil spills, and constant high-pressure washdowns while maintaining USDA, FDA, and OSHA compliance.

Warehouses & Logistics Corridors: Heavy-duty, joint-free epoxy coatings designed to eliminate concrete dusting, prevent joint spalling, and withstand continuous forklift and automated machinery traffic in 24/7 distribution centers.

Pharmaceutical & Healthcare Facilities: High-purity, easy-to-sanitize, slip-resistant surfaces tailored for sterile laboratory and manufacturing cleanrooms.

Manufacturing & Automotive Bays: Chemical- and impact-resistant coatings engineered to protect subfloors from heavy machinery, oils, and industrial solvents.

Epoxy Floor Contractor Since 1988

Precision Installation with Minimal Operational Downtime

Understanding that facility downtime impacts profitability, High Performance Systems utilizes advanced thermal-cured resins, rapid-cure topcoats, and flexible off-hours or weekend installation schedules.

> With over three decades of family-owned pride and technical expertise, our focus remains on providing commercial and industrial clients with tailored flooring systems that deliver long-term durability”
>
> *Jeffrey Smedley*

Every project adheres to a strict multi-step surface preparation and application standard:

Mechanical Substrate Preparation: Surface profile optimization using shot-blasting or diamond grinding (CSP standards) to ensure optimal mechanical bonding.

Moisture & Substrate Testing: Thorough diagnostic testing to prevent future delamination, bubbling, or moisture-related failures.

High-Penetration Priming & Base Coats: Application of high-solids epoxy primers designed to seal concrete pores and eliminate outgassing.

Customized Aggregate & Topcoat Finishing: Precision broadcasting of decorative quartz or anti-slip aggregates, finished with aliphatic urethane or polyaspartic topcoats for maximum UV

stability, chemical resistance, and slip safety.

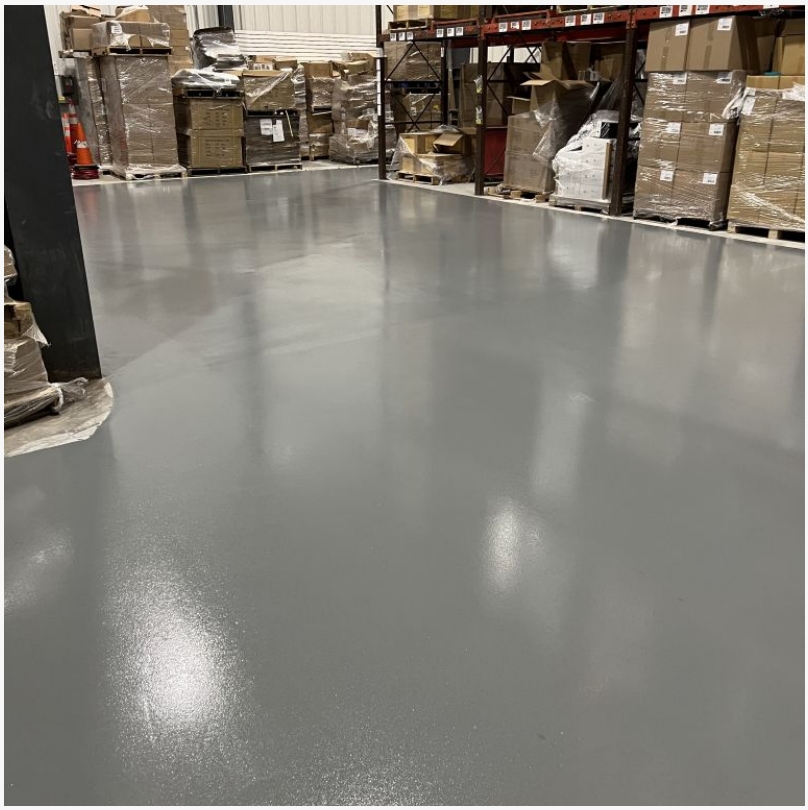

"A successful floor is only as good as its foundation," said a spokesperson for High Performance Systems. "With over three decades of family-owned pride and technical expertise, our focus remains on providing commercial and industrial clients with tailored flooring systems that deliver long-term durability, low maintenance, and maximum return on investment."

High Performance Systems exclusively serves commercial, industrial, and institutional sectors (no residential services). Facility managers, plant engineers, and general contractors can request a free on-site facility inspection and professional quote by visiting High Performance Systems or calling (800) 928-7220.

About High Performance Systems Corp.
Founded in 1988 and based in Middlesex, New Jersey, High Performance Systems Corp. is a family-owned industrial epoxy and protective resinous flooring contractor. Specializing in high-durability epoxy, quartz, chip, and urethane cement systems, the company provides certified installations for warehouses, food and beverage facilities, pharmaceutical labs, manufacturing plants, and commercial kitchens across New Jersey, Pennsylvania, and New York.
