HPS Flooring Marks Nearly Four Decades of Industrial and Commercial Resinous Flooring Across NJ and the Mid-Atlantic

HPS Flooring Marks Nearly Four Decades of Industrial and Commercial Resinous Flooring

Best Epoxy Restaurant Flooring

GREEN BROOK, NJ, UNITED STATES, October 5, 2026 /EINPresswire.com/ -- HPS Flooring LLC, a leading independent commercial and industrial epoxy flooring contractor based in Green Brook, New Jersey, continues its decades-long commitment to engineering high-performance floor coating solutions for industrial, commercial, and food service facilities across New Jersey, New York, and Pennsylvania.

Established in 1988, HPS Flooring brings nearly 40 years of hands-on technical expertise to heavy manufacturing plants, commercial kitchens, distribution hubs, locker rooms, and pharmaceutical cleanrooms. As an independent contractor, HPS Flooring customizes resinous floor systems using specialized materials sourced from top industry manufacturers rather than relying on single-supplier constraints.

"Every long-lasting floor depends on what’s underneath," says Jeffrey Smedley, President and Founder of HPS Flooring. "We don't just apply coatings—we engineer complete flooring systems built to withstand extreme traffic, chemical exposure, thermal shock, and heavy machinery. That process starts with certified technical surface preparation."

HPS Flooring's technical capabilities and service offerings include:

Heavy-Duty Concrete Surface Preparation: Utilizing heavy-duty diamond grinding and shot

blasting equipment to achieve exact Concrete Surface Profiles (CSP) necessary for permanent mechanical bonding.

Industrial Epoxy & Resinous Coatings: Multi-coat systems engineered for warehouses and manufacturing facilities to resist forklift traffic, severe abrasion, and aggressive chemical exposure.

Thermal Shock & Hygienic Urethane Cement Mortars: Seamless slurry systems featuring integrated radius cove bases, designed specifically for commercial kitchens and food processing plants subject to high-temperature washdowns.

Commercial Kitchen Floor System

Decorative Epoxy Flake & Quartz Systems: Seamless, slip-resistant multi-color flake finishes ideal for community centers, corridors, labs, and high-traffic public facilities.

Rapid Return-to-Service Formulations: Fast-curing resin technology capable of fully transforming and returning critical operational spaces back to service in as little as 48 hours.

Every project installed by HPS Flooring is managed by a dedicated project manager and on-site supervisor to ensure strict adherence to safety standards, quality control, and schedule requirements.

For more information, project inquiries, or to request a commercial flooring estimate, visit www.hpsfloors.com or contact HPS Flooring directly at 732-384-5577.
