

Maui Project Management Files Patent Application for Emergency - HELP AI App

Maui-Based Company Develops AI-Driven Disaster Preparation & Recover App: Hawaiian Emergency Link Portal (HELP) with Food-as-Medicine Support

HAIKU-PAUWELA, HI, UNITED STATES, October 6, 2026

/EINPresswire.com/ -- Maui Project Management Company, Inc. today announced that a U.S. provisional patent application covering core elements of the Hawaiian Emergency Link Portal ([HELP](#)) was filed with the United States Patent and Trademark Office on October 4, 2026 (Hawaiian time). The filing was submitted through USPTO Patent Center as Application No. 64/169,380 (Confirmation No. 4035). HELP is now patent pending.

HELP is an AI-supported disaster-resilience portal for Maui under a [Food-as-Medicine](#) for Disaster-Resilience approach. The [artificial intelligence](#) is designed to help residents, community partners, and responders find verified local contacts, guidance, and recovery resources during and after disasters. The application does not place emergency calls; it hands the number to the device's own dialer. Any food lists or nutrition-related content in HELP are for general information only and are not medical advice.

"On an island, health and food security go hand in hand. By looking to what grows around us, supporting local farmers, and sharing the knowledge of food as medicine, we can build a healthier, more prepared, and more resilient Maui - together," said Michelle Valentin, CEO of Maui Project Management Company, Inc.

The provisional application establishes a dated priority record for the invention while partner outreach, grant-supported build-out, and Google Play / App Store release continue. A nonprovisional U.S. application, and any foreign or PCT filings that claim the benefit of this provisional, must be filed by October 5, 2027, or the provisional filing date is lost.

Maui Project Management Company, Inc., a Hawaiian corporation (DCCA File No. 345745 D1), is the current owner of the registered trade name Hawaiian Emergency Link Portal and is
