Rad Web Hosting Named a Top Reseller Hosting Provider by HostAdvice for 2026

Rad Web Hosting recognized among HostAdvice's Top Reseller Hosting Providers for reseller-focused infrastructure, tools, and commitment to customer service.

Rad Web Hosting Named a Top Reseller Hosting Provider by HostAdvice for 2026

DALLAS, TX, UNITED STATES, October 6, 2026 /EINPresswire.com/ -- Rad Web Hosting, a provider of web hosting, cloud infrastructure, VPS, dedicated servers, and reseller solutions, today announced that it has been recognized by HostAdvice as a Top Reseller Hosting provider for 2026.

The recognition places Rad Web Hosting among the providers included in the "Top 25 Reseller Hosting 2026" awards from HostAdvice, a web hosting information and review platform that evaluates hosting companies and helps businesses, developers, agencies, and entrepreneurs compare hosting services.

> When our resellers succeed, we succeed. We intend to keep improving the platform, expanding automation, and giving our partners more ways to grow their businesses."
>
> *Scott Claeys, Founder and CEO of Rad Web Hosting*

The award reflects Rad Web Hosting's continued investment in building a reseller hosting platform designed to help customers launch, operate, and scale their own hosting businesses while maintaining control of their branding and customer relationships.

"We're honored to be recognized by HostAdvice as one of the Top Reseller Hosting providers for 2026," said Scott Claeys, Founder and CEO of Rad Web Hosting. "Reseller hosting has always been an important part of what we do. Our goal is to give hosting entrepreneurs, developers, agencies, and IT providers the infrastructure and tools they need to create sustainable hosting businesses without taking on the cost and complexity of building the underlying platform themselves."

Built for Hosting Entrepreneurs and Agencies

Rad Web Hosting's reseller hosting services are designed as white-label solutions, enabling customers to provide web hosting under their own company name and branding.

Resellers receive access to cPanel and WHM, allowing them to create and manage individual customer hosting accounts, define hosting packages, allocate resources, and administer client services from a centralized interface. Private nameserver support further helps resellers maintain a consistent brand throughout the customer experience.

Rad Web Hosting has been a leading provider of websites, hosting, cloud and dedicated server hosting since 2014.

Available reseller packages combine SSD-powered hosting infrastructure with technologies including LiteSpeed Web Server, LSCache, JetBackup, Imunify360, Softaculous, WP-CLI, and free SSL certificates.

Rad Web Hosting also offers reseller plans that include WHMCS, allowing hosting businesses to automate many of the repetitive tasks associated with operating a hosting company. WHMCS integration can be used for customer billing, service provisioning, account suspension and termination, domain services, invoicing, and support management.

"Successful resellers need more than disk space and bandwidth," Claeys said. "They need reliable infrastructure, automation, security, flexible growth options, and a provider that understands the hosting business from an operational perspective. We've continued developing our reseller platform around those requirements."

Expanding the Reseller Ecosystem

The HostAdvice recognition comes as Rad Web Hosting continues expanding its broader portfolio of reseller and white-label services.

In addition to traditional cPanel reseller hosting, the company provides solutions for businesses interested in reselling VPS servers, dedicated servers, domains, and managed hosting services. These options enable agencies and hosting companies to broaden their service catalogs while

relying on Rad Web Hosting for the underlying infrastructure.

In 2026, Rad Web Hosting further expanded those capabilities with new automation and reseller technologies designed around WHMCS and usage-based infrastructure. The company's reseller strategy is focused on reducing barriers to entry while giving established providers additional opportunities to expand their product portfolios.

That flexibility is increasingly important as web agencies, managed service providers, freelance developers, and other technology businesses look for ways to add recurring revenue without maintaining their own data center hardware.

With white-label hosting, businesses can bundle website hosting alongside design, development, maintenance, security, domain registration, and other digital services while retaining ownership of the customer relationship.

Recognition from HostAdvice

HostAdvice's hosting awards recognize providers across a variety of categories covering web hosting, VPS, dedicated servers, reseller hosting, WordPress hosting, cloud hosting, customer service, and other areas of the hosting industry.

Its reseller hosting evaluations consider areas important to businesses operating multi-customer hosting environments, including infrastructure resources, performance, scalability, branding capabilities, management tools, available features, customer service, pricing, and customer feedback.

Being included among the Top 25 Reseller Hosting providers for 2026 adds to Rad Web Hosting's growing portfolio of industry recognition and reinforces the company's focus on providing hosting solutions that balance performance, flexibility, automation, and responsive support.

"For us, recognition like this is ultimately about the customers building businesses on top of our infrastructure," Claeys added. "When our resellers succeed, we succeed. We intend to keep improving the platform, expanding automation, and giving our partners more ways to grow their businesses."
