

DSS and Sightview to Showcase Eye Care Technology at AAO 2026

Companies to demonstrate technology designed to improve VA ophthalmology workflows and give clinicians more time to focus on Veterans

NORTH PALM BEACH, FL, UNITED STATES, October 7, 2026

/EINPresswire.com/ -- [DSS, Inc.](#), a

leading provider of health information

technology (HIT) solutions for federal, private, and public health care organizations, announced today that it will join [Sightview](#) at AAO 2026, taking place Oct. 9 to 12 at the Ernest N. Morial Convention Center in New Orleans, Louisiana.

“

Eye care is highly specialized, and the technology clinicians use should reflect the way they actually care for patients.”

*Kenneth Emanuele, O.D.,
senior account manager at
DSS.*

DSS and Sightview will be located at booth #2355, where attendees can learn more about DSS Sightview, an electronic health record (EHR) solution designed specifically for VA eye clinics. The companies will host a live product demonstration on Oct. 11 at 3 p.m.

Better Workflows for VA Eye Clinics

Veterans rely on VA eye care professionals for services ranging from routine exams to treatment for complex eye conditions and service-related injuries. Giving those clinicians technologies designed around the unique needs

of ophthalmology and optometry can help make patient encounters more efficient and keep the focus on delivering quality vision care.

Earlier this year, DSS, which has decades of experience integrating health IT solutions within VA EHR environments, partnered with Sightview to bring modern ophthalmology capabilities into VA clinical environments. Sightview, the only electronic health record and practice management partner focused solely on eye care, builds and supplies technology solutions purpose-built for ophthalmology and optometry workflows.

The solution provides clinicians with a single-screen view that brings imaging, documentation,

and patient history together during the encounter. Specialty-built flow sheets support glaucoma, retinal and refractive care, while additional capabilities include automatic code capture, Smart Charting, treatment plans and integration with VistA/CPRS.

“Eye care is highly specialized, and the technology clinicians use should reflect the way they actually care for patients,” said Kenneth Emanuele, O.D., senior account manager at DSS who will be meeting customers on site. “Our partnership with Sightview gives VA ophthalmology and optometry teams technology designed around their workflows, helping reduce the time spent navigating systems so clinicians can spend more time focused on delivering high-quality care to Veterans.”

“Eye care is about so much more than just an exam, and clinicians need to spend their time and attention where it matters— on the patient,” said Tycene Fritcher, CEO at Sightview. “Sightview’s solutions reduce friction in the exam room and in the back office to make sure they can do just that. We’re thrilled to work side-by-side with DSS at AAO and at VA organizations across the country to bring modern, seamless solutions to the providers and organizations caring for our veterans and citizens.”

AAO 2026 attendees can visit DSS and Sightview at booth #2355 throughout the conference and see the solution in action during a live demonstration on Oct. 11 at 3 p.m.
