

InventionHome® Inventor Spotlight: Vehicle Mirror Wiper

LABELLE, FL, UNITED STATES, October 8, 2026 /EINPresswire.com/ -- The idea for Vehicle Mirror Wiper began with a simple but frustrating problem: difficulty seeing clearly through a vehicle's side mirror when it became wet or blurry. After finding that paper towels often left behind streaks or failed to clear the mirror, Katrina S. of LaBelle, FL, set out to create a more effective way to maintain visibility while

driving. Her goal was to develop a small, convenient tool that could be kept in a vehicle and used whenever the mirrors needed to be cleaned.

Vehicle Mirror Wiper is a handheld cleaning tool designed specifically for the side and rearview mirrors of residential and commercial vehicles. The device may incorporate a small squeegee that removes water, condensation, fog, and debris from the mirror surface while helping to minimize streaks and stains. Its compact design allows drivers to conveniently store the tool inside their vehicle for quick access when needed.

For Katrina, the inspiration came directly from her own experience with obstructed visibility. "I can't see out my side mirror, and [it gets] blurry when I wipe with anything else," she explains.

Designed to help everyone, Vehicle Mirror Wiper offers a simple solution for drivers looking for a convenient way to keep their mirrors clear and maintain better visibility on the road.

Companies interested in the Vehicle Mirror Wiper can contact [InventionHome](https://www.inventionhome.com) at member@inventionhome.com. Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at info@inventionhome.com or by calling 1-866-844-6512.

InventionHome® is a top-rated invention marketing and product licensing company dedicated to helping inventors successfully patent, prototype, and promote their new product ideas. From securing intellectual property to connecting with potential licensees, InventionHome® offers a streamlined path to commercialization.
