

GFS Chemicals® Announces New Line of Veritas® Trace and Veritas® Ultimate High Purity Acid Solutions

Hydrochloric Acid, Nitric Acid, and Sulfuric Acid in 1%, 3%, or 5% concentrations, available now

COOLUMBUS, OH, UNITED STATES, October 8, 2026 /EINPresswire.com/

-- GFS Chemicals®, a leading manufacturer of specialty and fine chemicals, has launched a new line of high-purity acid solutions under its Veritas® Trace and Veritas® Ultimate brands. Formulated for trace metal analysis, these high-purity acid solutions are designed to be used for ICP dilutions, microwave digestions, sample preparation, and laboratory cleaning applications. The line includes 18 Veritas Trace and 18 Veritas Ultimate offerings of Hydrochloric Acid, Nitric Acid, and Sulfuric Acid in 1%, 3%, or 5% concentrations.

“

These pre-made solutions have been in demand and will make lab work easier in sample preparation or cleaning labware, while reducing touchpoints to deliver a cleaner product for analysis.”

*GFS Chemicals Quality Control
Manager, Mike Firis*

Designed to complement the company's current high-purity acids used for trace metal analysis by ICP-OES and ICP-MS, these new high-purity acid solutions were developed to prevent background interference or skewed results by keeping diluted acids free of trace metal contamination.

In response to customer requests, the line was specifically developed for lab managers and chemists working in research and development, quality control, or quality assurance in the semiconductor, battery, and electronics industries.

Veritas Trace pre-diluted solutions provide sub-parts-per-billion (PPB) purity. For laboratories requiring pre-diluted solutions for ICP-MS, GFS Chemicals uses proprietary technology to manufacture Veritas Ultimate high-purity acid solutions with low [parts-per-trillion \(PPT\)](#) purity, ensuring accuracy and reliability. Both product lines are manufactured in the USA and conform to ISO 9000:2015. Veritas Trace products are available in 2.5- and 4-liter bottles, while Veritas Ultimate products are available in 1- and 2-liter bottles.

GFS Chemicals Quality Control Manager, Mike Firis, says, "We're always excited to create new products based on customer feedback. These pre-made solutions have been in demand and will make lab work easier in sample preparation or cleaning labware, while reducing touchpoints to deliver a cleaner product for analysis."

To review the new Veritas Trace and Veritas Ultimate high purity acid solutions available now for purchase, searchable by Item or CAS #, [visit here](#), or download this [brochure](#).
