

American IRA Hosts Chris Rawley for Webinar on Agricultural Investing with a Self-Directed IRA

Explore agricultural investing through farmland, livestock operations, and private lending within a Self-Directed IRA.

SIOUX FALLS, SD, UNITED STATES,
October 27, 2026 /EINPresswire.com/ --

American IRA announced that it will host an upcoming educational webinar featuring Chris Rawley of Harvest Returns, focused on agricultural investing and its potential role within a diversified Self-Directed IRA.

AMERICAN IRA
Self-Directed IRAs and 401Ks

During the webinar, Rawley will explain how investors can gain exposure to the agricultural industry through farmland ownership, livestock operations, and private lending to agricultural producers. The session will examine how farms, ranches, and agribusinesses generate income and how private capital can help support financing needs within American agriculture.

The discussion will explore the different structures available to passive agricultural investors, including direct farmland investments, operating businesses, and agricultural lending opportunities. Attendees will gain insight into how these investments are evaluated, including operator experience, collateral, leverage, fees, and liquidity requirements.

Rawley will also discuss the risks associated with agricultural investing, including weather events, disease, commodity price fluctuations, and extended investment holding periods. The session is intended to help Self-Directed IRA investors better understand agricultural investment opportunities and the due diligence considerations involved before committing retirement funds.

What You'll Learn

1. Understand Agriculture's Role

Learn how farms, ranches, and agribusinesses generate income through crops, livestock, leases, and lending, and how agricultural investments may contribute to retirement portfolio diversification.

2. Explore the Investment Options

Discover three approaches to agricultural investing: farmland ownership, investments in operating businesses such as livestock operations, and private lending to agricultural producers. Understand how financing structures, collateral, leverage, and liquidity can affect investment risk.

3. Evaluate the Opportunity

Learn how to assess agricultural operators, investment fees, compensation structures, and holding periods. Explore important due diligence questions and risks involving weather, disease, and commodity prices before investing retirement funds.

Event: October 28th at 12:00 PM ET
