

Sayvant Named Finalist in the 2026 Digital Health & AI Awards at HLTH

Sayvant advances from quarterfinalist to finalist in Transformative Care Delivery, with winners announced live November 16 at HLTH in Las Vegas.

SAN FRANCISCO, CA, UNITED STATES, October 19, 2026 /EINPresswire.com/ -- [Sayvant](#), the clinical

“

We built Sayvant to support physicians while there is still time to act, and we're proud to see our work recognized by the Digital Health Hub Foundation as part of the future of care delivery.”

Justin Mardjuki, CEO, Sayvant

documentation quality platform built by acute care physicians, today announced that it has been named a Finalist in the Digital Health Hub Foundation's [2026 Digital Health & AI Awards](#) in the Rising Star – Transformative Care Delivery category. Sayvant advanced from the Quarterfinalist round announced in September.

The recognition highlights Sayvant's work to bring documentation quality and clinical decision support into the acute care workflow while care is happening. From the emergency department through the inpatient stay, Sayvant

captures clinical reasoning as care unfolds and returns recommendations while there is still time to act on them. The result is a chart that holds up clinically, reflects the full complexity of each patient and is appropriately valued, with less documentation work for physicians.

The Digital Health & AI Awards honor organizations improving the speed, efficiency and equity of healthcare through digital innovation.

“Technology should help physicians make better decisions and ensure the record reflects the care they deliver. That record connects patient care to how hospitals measure quality and get paid. We built Sayvant to support physicians while there is still time to act, and we're proud to see our work recognized by the Digital Health Hub Foundation as part of the future of care delivery.”

— Justin Mardjuki, CEO, Sayvant

From a pool of more than 1,300 submissions, only the most promising companies in each track and category have advanced to this stage.

"The transition from Quarterfinalist to Finalist is where the competition really gets exciting," said Mark H. Goldstein, Chairman of the Digital Health Hub Foundation. "We're seeing companies

move beyond promising ideas to solutions that are changing how healthcare is delivered, experienced, and accessed. Our finalists represent an extraordinary range of innovation, and we can't wait to bring their achievements to the stage at HLTH in November."

The 2026 Digital Health & AI Awards will culminate on Monday, November 16, at HLTH USA at The Venetian in Las Vegas, where winners will be revealed live during three themed awards shows at the Awards Pavilion. Winners in Sayvant's category, Transformative Care Delivery, will be announced during the 5:00 PM show, The Future of Health & Intelligent Care.

Awards Day at HLTH — Monday, November 16

1:00 PM — Healthcare for Everyone: Access, Care & Community. Recognizing innovation in civic health, caregiving and aging, oral health, and cardiometabolic care.

2:30 PM — The Future of Medicine. Celebrating advancements in cancer detection, therapeutics and pharmacy, and women's and family health.

5:00 PM — The Future of Health & Intelligent Care. Highlighting transformative care delivery, home and remote care, mental and brain health, and healthy lifespan and longevity.

About Digital Health Hub Foundation

Our mission is to help the world's next best innovative healthcare companies scale and grow. Founded in 2017, on the campus of UCSF in San Francisco, our now 30,000 member community consists of thousands of early-to late-stage healthcare companies and highly qualified healthcare industry providers, payors, experts, mentors, investors, clinicians and researchers who participate in our annual awards ceremony where we bring together the industry to honor and validate the best of the best and celebrate the technological advances in healthcare and the impact it has.

About Sayvant

Sayvant is the documentation quality platform for acute care, built by acute care physicians. Working in real time across the whole stay, it captures clinical reasoning and checks documentation against clinical guidelines and the standard of care, producing notes that are complete, evidence-aligned, and appropriately valued. Health systems and physician groups use Sayvant to reduce documentation overhead, strengthen clinical defensibility, support accurate recognition of care complexity, and reduce denial risk. At the center of the platform is the [Sayvant Quality System](#), a physician-validated per-note scoring system for acute care documentation quality, deployed across 100+ sites and more than 1 million discharges.
