Brilliant Blind & Design Marks Nearly 20 Years Serving DC, Maryland and Virginia

Fairfax window treatment company works with Hunter Douglas, Graber, Alta, Somfy and Telamor on homes, hotels, restaurants and venues across the region.

FAIR OAKS, VA, UNITED STATES, October 19, 2026 /EINPresswire.com/ -- Brilliant Blind & Design, a custom window treatment company based at Fair Oaks Mall in Fairfax, Virginia, is marking nearly 20 years of designing and installing blinds, shades and drapery for homes and businesses across Virginia, Washington, DC and Maryland.

Over that time, the company has worked on both residential and commercial projects. Its portfolio includes celebrity residences, renowned hotels, fine dining restaurants and exclusive nightlife venues.

From one window to a whole building

The company describes its mission as elevating everyday living by turning windows into "timeless works of art". It pairs luxury materials with precise measurement and professional installation, aiming for comfort, performance and style that last.

Brilliant Blind & Design offers a full range of window treatments in Fairfax, VA and the surrounding region:

Drapery. Custom drapes, custom sheers and drapery hardware.

Shades. Roller, solar, sheer, banded or zebra, natural woven, cellular or honeycomb, pleated and vertical shades, sliding panels and exterior solar shades.

Blinds. Wood, faux wood, aluminum and vertical blinds.

Motorized window treatments. Automated blinds, shades and drapes for homes and commercial spaces.

The company's guidance on custom drapes notes that they can be made from premium fabrics such as silk, velvet and linen and tailored to exact window dimensions, adding light control, privacy and insulation.

Five premium brand partners

Brilliant Blind & Design works with five brand partners, each covering a different part of its range.

Hunter Douglas. Custom blinds, shades and shutters with light-control systems and energy-efficient designs. The Fairfax showroom has offered Hunter Douglas PowerView automation.

Graber. Made-to-measure shades, blinds, shutters and drapery, including motorized and energy-efficient designs, backed by a warranty.

Alta Window Fashions. Custom blinds, shades and shutters with BLISS Automation, which can be controlled by app, remote or voice and connected to smart-home systems.

Somfy. Motors and smart controls for window treatments, with remote, app and voice control and support for popular smart-home platforms.
Telamor. Exclusive fabrics and window treatments drawing on decades of expertise.

The rise of motorization

The company sees motorization as the future of window treatments, and has made home automation a central part of its business. Motorized systems can be operated from a smartphone app, a wall switch or a voice assistant such as Alexa or Google Home, and can run on automated schedules. They can also be linked with other home automation, including lighting and thermostats, and used in living rooms, bedrooms, home theaters, offices and commercial spaces. According to the company, scheduled shades can adjust to the time of day or the weather, helping to reduce energy costs.

A three-step process

Every project follows the same three steps:

Consultation and quote. Clients start with a complimentary consultation and receive a quote tailored to their space.

Design and measurement. The company's experts visit the home or office to take precise measurements and guide the client through fabric, color and system choices.

Professional installation. Skilled installers fit each treatment with white-glove service.

Customer reviews published on the company's website describe the team bringing fabric samples into clients' homes to match existing furniture, and note that tailoring, stitching and

installation are handled in house.

How to choose window treatments

Brilliant Blind & Design advises homeowners shopping for custom shades in Northern Virginia to consider five factors. First, materials should suit the décor while adding practical benefits such as insulation and light control. Second, the room's purpose, the direction of sunlight and the level of privacy needed all matter; a bedroom may call for blackout shades, while a living room may suit light-filtering styles. Third, made-to-measure treatments give a tailored fit.

Fourth, motorization adds convenience. Finally, the right treatment should reflect personal style while making everyday living easier.
