

Test Your Team for the Unexpected: Nimbl Launches Emergency Response Platform

New Feature Helps Flight Departments Practice Their Response and Coordinate When a Real Emergency Occurs

LAS VEGAS, NV, UNITED STATES, October 20, 2026 /EINPresswire.com/ -- [Nimbl](#), business aviation's most popular manuals and safety management software, has introduced a new Emergency Response Platform, built directly into the Nimbl app, that gives operators a central hub to plan for, practice and respond to emergencies. The new feature enables teams to run simulations, identify potential gaps and become familiar with their roles, then use the same module to access critical information and coordinate their response when a real emergency occurs.

Nimbl is showcasing the new platform at NBAA-BACE in Las Vegas, October 20–22, at booth #3135, where attendees can see firsthand how the dashboard provides quick and easy access to key information when it matters most. The feature gives easy and fast access to the company's ERP manual, emergency checklists, key contacts, emergency response team members, status updates, forms, and more.

When an emergency is activated through Nimbl's Emergency Response Platform, users are prompted to record key details that can be updated as the event develops. Critical information, including the type of emergency, elapsed time, and affected aircraft, remains visible at the top of the screen, giving the response team a clear view of the situation as it unfolds.

"This is a feature we hope nobody ever has to use in a real emergency, but if that day comes, having an Emergency Response Platform in place is crucial to ensure flight departments are prepared if something goes wrong," said Mark Baier, CEO, Nimbl. "Easy access to critical information, combined with familiarity with the procedures, can save valuable time when every second matters. Response simulations and resources in a centralized hub help flight teams build the confidence to act quickly and effectively when a real emergency occurs."

These new capabilities reflect Nimbl's broader mission to make it easier for operators to become better and safer. Nimbl's technology is backed by a team of aviation experts who are just a call away, giving operators the convenience of intuitive software with access to real people when they need additional guidance and support.

NBAA-BACE attendees are invited to stop by Nimbl booth #3135 to see the new ERP in action, explore the features firsthand, and meet the aviation experts behind the technology.

About Nimbl: Nimbl is the only solution that combines SMS, procedures manuals, and compliance support to operators providing continuous self-improvement. Formerly known as AviationManuals, Nimbl began its history in 1996 with International Operations Procedures Manuals and supports over 4,700 operators worldwide. Headquartered in the Washington, D.C. metro area, Nimbl's guiding principle is to provide the tools flight departments and FBOs need to keep making their operations better and safer.
