

Modigent Expands National Strategy With Integrated Energy Solutions

Modigent Energy Solutions combines expertise, building intelligence, and financing to help customers lower operating costs and modernize critical infrastructure

PHOENIX, AZ, UNITED STATES, October 28, 2026 /EINPresswire.com/ -- [Modigent](#), a national leader in infrastructure, technology, and mechanical solutions, today announced the expansion of [Modigent Energy Solutions](#), a strategic initiative

that connects expertise across the company to help customers improve facility performance, reduce operating costs, and move critical infrastructure projects forward.

“

We bring the technical and financial pieces together, giving customers a practical path to improve facility performance without competing for upfront capital.”

Dan Bueschel, CEO of Modigent

The initiative builds on the experience of Rich Energy Solutions, which joined Modigent in March 2025. It gives customers a coordinated path from identifying opportunities and evaluating project economics to financing and implementing improvements.

“Customers often know their facilities need attention, but competing capital priorities can make it difficult to act,” said Dan Bueschel, CEO of Modigent. “We can bring the technical and financial pieces together, so they have a practical path forward.”

Modigent Energy Solutions can help customers assess energy use, upgrade mechanical systems, improve building controls and monitor performance over time. For qualifying projects, financing options may allow customers to pay for improvements over time instead of relying entirely on upfront capital.

That approach is especially relevant as organizations contend with aging equipment, rising utility

costs, and pressure to make existing buildings work harder.

“We’ve spent years helping customers understand where their buildings are losing efficiency and how to make improvements financially viable,” said David Rich, Vice President of Modigent Energy Solutions and Co-founder of Rich Energy. “Now we can pair that experience with Modigent’s technical teams and national reach to take projects from assessment through execution.”

Rich Energy’s team has completed projects in more than 40 states. Its energy practice grew out of a family mechanical business founded in 1918 and has focused primarily on energy projects since 2010.

Modigent is also investing in remote monitoring and building automation to help customers and technicians spot issues earlier and make better decisions about ongoing facility performance.

Dan Bueschel and David Rich discuss the strategy behind Modigent Energy Solutions in an interview moderated by Carey Peña. [Watch the interview here.](#)
