Microsoft Verifies Referna in Partner Center

Microsoft confirms verification of InTouch123 Inc., the company behind Referna, as the referral network expands Microsoft sign-in and Outlook calendar support.

CLEVELAND, OH, UNITED STATES, November 16, 2026 /EINPresswire.com/ -- Microsoft has successfully verified the Partner Center profile of InTouch123 Inc., the company behind Referna (https://referna.com/), a referral network for independent experts serving technology companies.

> Microsoft has been a great partner for us. We're excited to build on that relationship as we expand Microsoft sign-in and Outlook calendar support."
> *Matan Protter, CEO of Referna*

Microsoft confirmed the verification in an email dated October 17, 2026. The notice stated: "We've successfully verified your profile, and you now have access to Microsoft Partner Center." The confirmation identifies InTouch123 Inc., Referna's legal entity, as the company whose Partner Center profile was verified.

"Microsoft has been a great partner for us," said Matan Protter, CEO of Referna. "We're excited to build on that relationship as we expand Microsoft sign-in and Outlook calendar support."

The milestone accompanies Referna's expansion of Microsoft sign-in and Outlook calendar support. Independent professionals who use Microsoft's ecosystem can access Referna with a Microsoft account and choose to connect an Outlook calendar they already use for their business.

Referna helps independent experts build relationships with complementary professionals who serve similar clients. Its Circles bring members together for recurring weekly sessions, while individual meetings give members opportunities to learn about one another's work and develop referral relationships. Participants can include fractional executives, consultants, recruiters, agency owners and startup lawyers.

Microsoft sign-in lets members access Referna with a Microsoft account. Outlook calendar connection is a separate choice, allowing members to connect a calendar for availability and, depending on the permissions selected, meeting qualification and preparation. Members do not need to use the same provider for their Referna sign-in and their connected calendar.

The integration supports work and school Microsoft accounts as well as personal Microsoft

accounts. Work and school accounts can use an availability-only connection that accesses busy time blocks rather than event content. Personal Microsoft accounts require the full calendar-reading connection. Microsoft's consent screens present the requested permissions before access is granted.

Referna's Microsoft integration does not request permission to send email, edit calendar events or access files. The company describes its Microsoft data access and permission choices in its privacy policy at https://referna.com/privacy/.

For independent professionals whose client work already runs through Outlook, the update broadens the ways they can participate in Referna without changing their existing calendar provider. Microsoft options sit alongside Referna's Google sign-in and calendar connections.

Professionals can learn more and apply to join Referna at https://referna.com/.

About Referna

Referna is a referral network for independent experts serving technology companies. It brings complementary professionals together through weekly Circles and individual referral relationships. Referna is a product of InTouch123, Inc.
